Stormwater and Erosion Control Certification Class

***Tuesday, July 20, 2010
8:00 am - 5:00 pm***

This is a one-day seminar on stormwater and erosion control techniques, procedures and legal requirements of the Phase II Stormwater Regulations. This includes an intensive look at stormwater and erosion control techniques, practices and minimum requirements for working on sites from single family residential to large scale earthmoving. It is designed for anyone assigned to install or maintain stormwater and erosion control devices.

Upon successful completion of this course, attendees will receive Stormwater Supervisor certification. This class will focus on advanced legal requirements, supervisory duties, paperwork requirements and CDOT specific requirements that are applicable to any size construction project.
